

Simplybook service provider instructions

November 2025

Introduction

These instructions provide detailed guidance on setting up and managing service provider availability using the Simplybook platform.

Simplybook is Crystal Health Group's (CHG) chosen platform for managing online appointment bookings at selected locations. This document outlines the key features and functionalities that service providers will use, including:

- Logging in to the platform
- Releasing your availability
- Viewing bookings via the calendar feature
- Synchronising with Google and Outlook calendars

Each of these features is explained in detail within this guide.

First-time login (Browser – desktop or mobile)

1. Enter the following URL - <https://crystalhealth.secure.simplybook.it/>
2. If prompted for a company name, enter **crystalhealth**
3. Enter your user login (provided by separate email) and password.
4. You may change your password by selecting 'Forgot password'.
5. If you do so, follow the prompts to generate a new password and return to this screen to login using your new password.

Setting up Two-factor (2FA) authentication using Google Authenticator

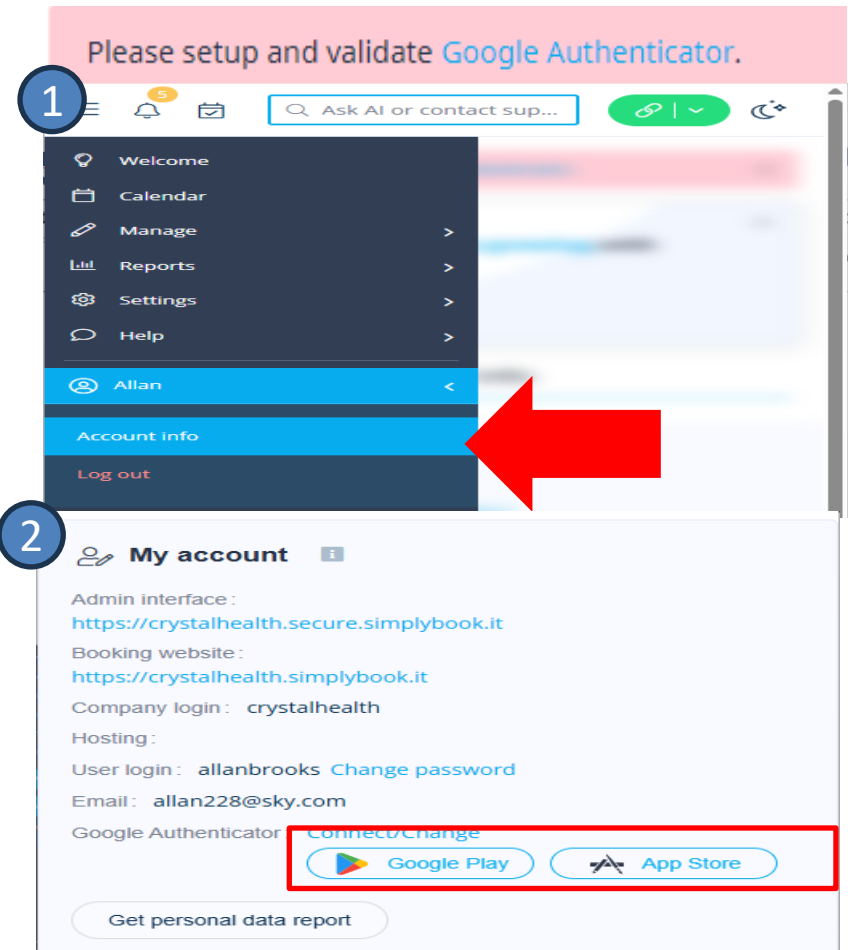

To protect sensitive client and company information, you must set up two-factor authentication (2FA). This adds an extra layer of security to your SimplyBook account.

1. Login to Simplybook **via your browser (not the app)**. The setup process can be completed on either desktop or mobile, but you'll need your phone to install the Google Authenticator app. Navigate to your account info via your name in the menu. **Alternatively, you can click the banner at the top of the page.**

2. Install the Google Authenticator app by clicking on the relevant app store:
 - Google Play for Android
 - App Store for IOS

Open Google Authenticator App on your phone and login.

Secret key:
KAB5 O3RC APR5 52NR

Important! If you lose your mobile device and along with it the code generator, you won't be able to log in to your account anymore. In this case you can contact the support to restore the access after verification process. Please add the recovery phone number you'd like to use to confirm your identity in user details.

To confirm the third party app is set up correctly, enter the security code that appears on your phone.

Setting up Two-factor (2FA) authentication using Google Authenticator

4. Click the + sign in the bottom right hand corner and select 'Enter a setup key'.
5. On the next screen, enter the account name 'Simplybook', and paste the copied secret key code into the 'Your key' field. The 'Type of key' field should be set as 'Time based'. Click Add – Simplybook will now appear in the Google Authenticator list with a time-based generated code.
6. Return to Simplybook, scroll to the bottom of the page and enter the code generated by Google Authenticator into the security code box and click Save to successfully setup 2-factor authentication.
7. You will be prompted to enter a new code every time you log into SimplyBook. If you stay logged in, you won't be asked for a code.

If you experience issues linking Google Authenticator, please contact CHG. We can verify and reset your 2FA setup if needed.

Releasing your availability

1. When you click on a day in the calendar, a pop-up window will appear showing the day selected.
2. Select 'is working day?' to release availability.
3. A new window will appear showing default operating hours. You should adjust these to reflect your actual availability for that day.

November 2025

Releasing your availability

1. You can also fine tune your availability for a given day by selecting 'Show advanced settings'.
2. This option allows you to set availability in increments of 15 minutes if required.

Releasing your availability

1. You can also select multiple days to release availability (if suitable – see point 2 below) by switching ON the 'Enable group dates selection?' function highlighted below.
2. IMPORTANT - the availability set for the grouped dates must be the same across all dates. In other words, this function should not be used if you plan on having different availability for different days.

A screenshot of a web application interface for managing a service provider's schedule. The interface is titled "Service provider's details" with the name "Adeola Daramola" below it. Below this is a section titled "Service provider schedule" with "Cancel" and "Save & Close" buttons. A yellow informational box states: "Please note that schedule changes will be applied automatically to previously saved service providers, regardless of 'Save&Close' button". Below this is a toggle switch for "Do you want to set provider's schedule on special days only?" which is currently turned on. A blue instruction box says: "You can set your service provider schedule per day here. Just click on a date to set the working hours." Below this is another toggle switch, "Enable group dates selection?", which is currently turned off and is circled in red. Below the toggle is a calendar for "August 2025" showing days from 28 to 31. A legend at the bottom explains the color coding for the calendar: blue for "Selected day", orange for "Company special working day", red for "Special working day", green for "Working day", yellow for "Company special day off", and pink for "Special day off".

Availability – Important Guidelines

1. Keep Availability Accurate and Current

- It's crucial to ensure your released availability on Simplybook reflects your actual schedule.

2. Online Bookings

- If you have agreed to accept online bookings, clients can book immediately within the times you've specified—no prior confirmation with CHG is required.
- Accurate availability minimises booking conflicts and ensures seamless service delivery.

3. One-Day Advance Visibility

- Your availability will display one working day in advance. This allows CHG to prepare and send you the necessary paperwork for appointments.

4. Benefits of the Calendar Function

- Online bookings streamline the process by reducing back-and-forth communication to confirm appointments.
- It provides full visibility of your future bookings, reducing errors and improving efficiency.

5. Considerations for Mobile Collection Officers

- If you're attending Regus locations, we will aim to batch telephone bookings for consecutive appointments.
- Online bookings, however, may result in gaps that require multiple visits to the same location. Factor this into your scheduling decisions.

6. Special Considerations for Simplybook Use

- Simplybook is strictly for your designated location(s), such as clinics, mobile coverage or Regus offices.
- Mobile collection bookings will now use the availability you set in Simplybook. Any necessary travel time, between mobile collections or two/from your fixed location (e.g., Regus), will be blocked off for you by CHG. If this setup doesn't work with your schedule, please contact us so we can help tailor a solution that fits your mobile collection needs.

7. Permitted Services for Online Booking

- Online bookings are limited to sample collection and OHT (Occupational Health Testing) activities you are trained to perform.
- Online booking is not available for complex DNA tests (e.g., sibling, grandparent, avuncular, twin) or hair and blood drug/alcohol testing.

System Functions – Important Guidelines

Your user role has been designed to allow access only to information related to your specific location(s). While this permission includes the ability to add or edit bookings, **please do not use this feature**—all bookings will be managed by CHG.

Permitted Functions on Simplybook:

1. Set Your Provider's Schedule

- Use this function to release your availability.

2. View Calendar

- You may view bookings but must not add, edit, or delete them.

3. Sync Your Calendar

- Synchronise Simplybook with your Google or Outlook calendar to streamline scheduling.

Accessing Simplybook:

- These instructions are optimized for desktop use, but you can also download the **Simplybook.me Admin App** from Google Play or the App Store. The app offers key features with slight interface differences.

Benefits of Using the App:

- **Mobile Notifications:** Receive updates for confirmed, changed, or cancelled bookings directly to your mobile device.
- **Convenience:** Set a PIN to avoid repeated logins.

App Login Information:

- The company login is: **crystalhealth**
- You'll need your personal login details to access your account.
- Two-factor authentication (2FA) is mandatory for all users and must remain active on your SimplyBook account. Please do not disable it. Contact CHG Support if you experience login issues.

App Limitations:

- Due to your role access, the app **does not support setting your provider's schedule or releasing availability**.
- To access these features, log in through your phone's web browser (e.g., Safari on iPhone).
